

Application Integration Services

Most businesses use multiple software solutions, developed in-house or by a third-party vendor to manage their products & materials, client information, billing, and business logic. The increasing demand for integration makes it necessary for organizations to have the agility to respond quickly to change, manage and streamline their processes, yet still have a scalable and reliable system. Advantage Industries can help provide you with flexible integration solutions and services and standardize integration with multiple data sources. Our highly skilled application team is familiar with a wide range of technologies, frameworks and methodologies, which allow us to work on the most complex application integration needs.

Features of Application Integration:

- Connect business applications, such as accounting systems, inventory systems, customer relationship management (CRM) systems
- Enterprise Service Bus (ESB) to simplify, expedite, and streamline their application integration
- System Architecture Design
- The Business Rules Management (BRM) service offers solutions that improves business processes
- Product and Data Migration
- Product Evaluation and Analysis
